

# Compost Tea

## Description

\*Vermicompost workshop is strongly recommended as a prerequisite.

In this workshop, we take worm castings produced in our vermicompost bins and through the help of aeration and microbes, transform it into a powerful brew. Later we apply the tea in the garden to permeate the soil with these beneficial microorganisms.

## Key Learning Outcomes

- Microbiology, beneficial microorganisms, Aerobic vs Anaerobic microorganisms
- Natural farming techniques, natural fertilizers, human impact on ecosystems

## Time Frame

1 period

## Materials

- Worm castings
- Molasses
- Cheese cloth or sock
- 5 gallon bucket
- Fish tank aerator
